

BOWL INVERTERS

Most process bowls (including those used with mixers, granulators, and fluid bed dryers) do not provide a bottom discharge outlet, so they are typically unloaded by scooping, dumping or inverting.

METO offers a full line of bowl inverters and tippers to help with these tasks.

Several options are available to cover the full range of capacities and budgets.

Options are available for integrated weighing operations and XP rated areas.

Features

- Drives: Pneumatic, Electric, Hydraulic
- Controls: Pneumatic, electric (24 VDC), basic, semi-automatic, full automation through PLC, integrated communication with plant control systems
- Stainless Steel construction with fine finishes for clean process areas.
- Discharge cones available with manual or automated clamping.
- Height and reach as required by application.
- Fail safe lift mechanisms hold the platform in position without drift despite loss of utilities.
- Interlocking with gates and barriers forces a specific sequence of operation thereby enhancing operator safety.
- Rotational column option provides for precise positioning.
- Simplicity of design using standard components means minimized maintenance costs.

For more than 40 years, Meto Lift, Inc. is a leading supplier of process and material handling equipment for a variety of industries, including food, fine chemical, nutraceutical and pharmaceutical.

Experience

Meto Lift is an industry leader for lifting, positioning, blending and handling equipment for “clean” process industries. With more than four decades of experience, we have accumulated a knowledge base second to none. Couple this with experience integrating the full scope of other manufacturers’ equipment, and we can deliver the best solution for your project needs.

Rugged, reliable design

The METOLIFT™ line of equipment is designed for reliable service over many years, our solutions can run 24/7/365 with minimal routine maintenance. High quality components are used throughout, and our stainless steel structures are just that—all stainless steel, no stainless steel cladding materials are used.

Installation Savings

All METOLIFT™ equipment is configured to provide you with a complete system with little or no need for any on-site assembly. The majority of our lifts are installed and running in less than four hours with minimal requirement for outside contractors.

Detailed Engineering Support

Have a tough application? Not sure how you will fit it into your facility? MetoLift’s engineering department will provide you with system layouts for your project in advance of any purchase. Short on time and resources? Give us a call and let us fill the gap.

Fast Delivery

Meto’s modular design philosophy offers the shortest lead times for custom equipment in the industry.

Expert Service

Need assistance with installation? Start-up? Training? Preventative Maintenance? All service personnel are fully qualified and factory trained. In most instances, our technician is dispatched directly from our factory in New Jersey and will have had knowledge of your machine from the very start of its assembly. We strive to provide best-in-industry customer response times. Often our technicians can arrive the same-day or the next day for emergency service calls.
