

# DRUM CONDITIONERS

Assists in the loosening of hard-packed powders by squeezing flexible plastic or fiber wall drums

Designed to break-up solidified hygroscopic materials

## OPERATION

A pedestal design with two stationary half-ring pairs with adjustable height. Four pneumatic cylinders squeeze the drum between the two ring halves. Adjustable compression pressure via a pressure regulator. Two handed controls with emergency stop release. Clamping pressure releases when the control is not depressed

## CONSTRUCTION

304 Stainless Steel construction with #4 finish. Suitable for wash-down and clean room environments.

## CAPACITY

Able to handle a wide range of drums, up to 24 inches in diameter

## MULTIPLE CONFIGURATIONS

Stationary, Mobile, Rotating Turntable and Pass-Thru Conveyor

Innovators For  
Cleanroom Material  
Handling

[www.metolift.com](http://www.metolift.com)

**For more than 40 years, Meto Lift, Inc. is a leading supplier of process and material handling equipment for a variety of industries, including food, fine chemical, nutraceutical and pharmaceutical.**

### **Experience**

Meto Lift is an industry leader for lifting, positioning, blending and handling equipment for “clean” process industries. With more than four decades of experience, we have accumulated a knowledge base second to none. Couple this with experience integrating the full scope of other manufacturers’ equipment, and we can deliver the best solution for your project needs.

### **Rugged, reliable design**

The METOLIFT™ line of equipment is designed for reliable service over many years, our solutions can run 24/7/365 with minimal routine maintenance. High quality components are used throughout, and our stainless steel structures are just that—all stainless steel, no stainless steel cladding materials are used.

### **Installation Savings**

All METOLIFT™ equipment is configured to provide you with a complete system with little or no need for any on-site assembly. The majority of our lifts are installed and running in less than four hours with minimal requirement for outside contractors.

### **Detailed Engineering Support**

Have a tough application? Not sure how you will fit it into your facility? MetoLift’s engineering department will provide you with system layouts for your project in advance of any purchase. Short on time and resources? Give us a call and let us fill the gap.

### **Fast Delivery**

Meto’s modular design philosophy offers the shortest lead times for custom equipment in the industry.

### **Expert Service**

Need assistance with installation? Start-up? Training? Preventative Maintenance? All service personnel are fully qualified and factory trained. In most instances, our technician is dispatched directly from our factory in New Jersey and will have had knowledge of your machine from the very start of its assembly. We strive to provide best-in-industry customer response times. Often our technicians can arrive the same-day or the next day for emergency service calls.
