

EQUIPMENT POSITIONERS

Many process applications call for lifting and then positioning process equipment in line with the material flow or over mix tanks.

METOLIFT™ lift columns offer the option of manual or powered swivel (rotation) of the lift column to facilitate the positioning of the elevated load.

Columns can rotate through a 350 degree arc and are capable of supporting multiple destinations. Several options are available to cover the full range of capacities and budgets.

Options are available for integrated weighing operations and XP rated areas.

Features

- Drives: Pneumatic, Electric, Hydraulic
- Controls: Pneumatic, electric (24 VDC), basic, semi-automatic, full automation through PLC, integrated communication with plant control systems
- Stainless Steel construction w/fine finishes for clean process areas.
- Lift attachment configured to the requirements of the specific application.
- Fail safe lift mechanisms hold the lift in position without drift even on loss of utilities.
- Interlocking with gates and barriers forces a specific sequence of operation thereby enhancing operator safety.
- Rotational column option provides for precise positioning.
- Simplicity of design using standard components means minimized maintenance costs.
- Mobile Design

www.metolift.com

For more than 40 years, Meto Lift, Inc. is a leading supplier of process and material handling equipment for a variety of industries, including food, fine chemical, nutraceutical and pharmaceutical.

Experience

Meto Lift is an industry leader for lifting, positioning, blending and handling equipment for “clean” process industries. With more than four decades of experience, we have accumulated a knowledge base second to none. Couple this with experience integrating the full scope of other manufacturers’ equipment, and we can deliver the best solution for your project needs.

Rugged, reliable design

The METOLIFT™ line of equipment is designed for reliable service over many years, our solutions can run 24/7/365 with minimal routine maintenance. High quality components are used throughout, and our stainless steel structures are just that—all stainless steel, no stainless steel cladding materials are used.

Installation Savings

All METOLIFT™ equipment is configured to provide you with a complete system with little or no need for any on-site assembly. The majority of our lifts are installed and running in less than four hours with minimal requirement for outside contractors.

Detailed Engineering Support

Have a tough application? Not sure how you will fit it into your facility? MetoLift’s engineering department will provide you with system layouts for your project in advance of any purchase. Short on time and resources? Give us a call and let us fill the gap.

Fast Delivery

Meto’s modular design philosophy offers the shortest lead times for custom equipment in the industry.

Expert Service

Need assistance with installation? Start-up? Training? Preventative Maintenance? All service personnel are fully qualified and factory trained. In most instances, our technician is dispatched directly from our factory in New Jersey and will have had knowledge of your machine from the very start of its assembly. We strive to provide best-in-industry customer response times. Often our technicians can arrive the same-day or the next day for emergency service calls.
