

MINI UTILITY LIFTS

Robust yet economical lifting solution.

Designed to be versatile. To be able to move into tight spots, and handle a wide range of weights and drum sizes.

METO offers the MiniLIFT line for those who are looking for a lower cost yet reliable lift to service a wide variety of lifting tasks. Constructed of stainless steel, the MiniLIFT is available with battery powered or pneumatic lift systems. It is configured specifically with the requirements of a clean process area in mind.

A wide range of configurations and attachments service tasks ranging from simple elevation of storage containers to the grasping, lifting and inverting of process containers

Multiple attachments and quick-change configurations make this a versatile performer.

Featuring:

- Stainless Steel construction
- Fail-safe lift drive
- 5/5 swivel casters w/non-marking wheels
- 24V DC brakemotor
- Solid-state motor controllers
- Pushbutton operator interface (on-column or pendant mounted)
- Slot cover (FDA compliant material) minimizes dust incursion
- Battery power supply provides for over 150 cycles of operation.
- An on-board battery charger plugs directly into any standard electrical wall outlet.
- Option for all pneumatic systems include on-board air handling equipment.

www.metolift.com

For more than 40 years, Meto Lift, Inc. is a leading supplier of process and material handling equipment for a variety of industries, including food, fine chemical, nutraceutical and pharmaceutical.

Experience

Meto Lift is an industry leader for lifting, positioning, blending and handling equipment for “clean” process industries. With more than four decades of experience, we have accumulated a knowledge base second to none. Couple this with experience integrating the full scope of other manufacturers’ equipment, and we can deliver the best solution for your project needs.

Rugged, reliable design

The METOLIFT™ line of equipment is designed for reliable service over many years, our solutions can run 24/7/365 with minimal routine maintenance. High quality components are used throughout, and our stainless steel structures are just that—all stainless steel, no stainless steel cladding materials are used.

Installation Savings

All METOLIFT™ equipment is configured to provide you with a complete system with little or no need for any on-site assembly. The majority of our lifts are installed and running in less than four hours with minimal requirement for outside contractors.

Detailed Engineering Support

Have a tough application? Not sure how you will fit it into your facility? MetoLift’s engineering department will provide you with system layouts for your project in advance of any purchase. Short on time and resources? Give us a call and let us fill the gap.

Fast Delivery

Meto’s modular design philosophy offers the shortest lead times for custom equipment in the industry.

Expert Service

Need assistance with installation? Start-up? Training? Preventative Maintenance? All service personnel are fully qualified and factory trained. In most instances, our technician is dispatched directly from our factory in New Jersey and will have had knowledge of your machine from the very start of its assembly. We strive to provide best-in-industry customer response times. Often our technicians can arrive the same-day or the next day for emergency service calls.
