

STATIONARY DRUM INVERTERS

Drum Inverters are used throughout industry for transfer of powders/pellets/tablets from a drum.

As opposed to 'dumping' devices, the inverter provides for a closed and controlled transfer. METO drum inverters are specifically designed for use in "clean" areas as typically found in pharmaceutical and nutritional manufacturing.

Standard Features

- 304 Stainless Steel construction with satin finish
- 316L Stainless Steel product contact
- Three axis motion
- All welds ground and polished
- Discharge path customized to your application
- Minimal maintenance
- Push-button controls mounted on column
- Handles containers of all types and sizes
- Fail-safe operation
- Easy to clean design
- Sanitary roller slot cover

Options

- Discharge multiple containers simultaneously
- Electric or pneumatic powered
- Upgrade materials of construction and upgrades of surface finishes
- Increased lift capacity
- Flow aides
- System Integration

www.metolift.com

For more than 40 years, Meto Lift, Inc. is a leading supplier of process and material handling equipment for a variety of industries, including food, fine chemical, nutraceutical and pharmaceutical.

Experience

Meto Lift is an industry leader for lifting, positioning, blending and handling equipment for “clean” process industries. With more than four decades of experience, we have accumulated a knowledge base second to none. Couple this with experience integrating the full scope of other manufacturers’ equipment, and we can deliver the best solution for your project needs.

Rugged, reliable design

The METOLIFT™ line of equipment is designed for reliable service over many years, our solutions can run 24/7/365 with minimal routine maintenance. High quality components are used throughout, and our stainless steel structures are just that—all stainless steel, no stainless steel cladding materials are used.

Installation Savings

All METOLIFT™ equipment is configured to provide you with a complete system with little or no need for any on-site assembly. The majority of our lifts are installed and running in less than four hours with minimal requirement for outside contractors.

Detailed Engineering Support

Have a tough application? Not sure how you will fit it into your facility? MetoLift’s engineering department will provide you with system layouts for your project in advance of any purchase. Short on time and resources? Give us a call and let us fill the gap.

Fast Delivery

Meto’s modular design philosophy offers the shortest lead times for custom equipment in the industry.

Expert Service

Need assistance with installation? Start-up? Training? Preventative Maintenance? All service personnel are fully qualified and factory trained. In most instances, our technician is dispatched directly from our factory in New Jersey and will have had knowledge of your machine from the very start of its assembly. We strive to provide best-in-industry customer response times. Often our technicians can arrive the same-day or the next day for emergency service calls.
